## Evaluation Form for the Functional end-to-end Testing - Patient Summary

### Introduction

**The functional end-to-end testing validates, from the user point of view, the process and the information presented to health professionals using the MyHealth@EU services.**

The evaluation is carried out for all the services in an environment that intends to emulate the normal operation as much as possible. For more details on the methodology of the testing, please check the dedicated page here.

The tool used to collect the feedback from the health professionals and semantic experts participating in the testing is the Evaluation Form, which is provided using the European Commission online tool EUSurvey.
